

As residents of Indiana, we are glad the Do Not Call list was implemented by our state. Please do NOT allow those that feel they have the right to call us to advertise their services to take our right to privacy away. It is bad enough that you still allow them to bother us on "business" lines. We are tired of the government usually siding with the businesses rather than caring about citizens. Many of those calling are trying to cheat our fellow citizens out of their money. Please side with us by NOT allowing the banking industry to take list protection away. You all are in the same boat, not liking unwanted calls to YOU! Don't you think we deserve the same consideration?

Another thing you ought to stop is allowing advertisers on TV to say one thing in the ads and then show all the things they don't say in illegible writing to flash on the screen a few seconds so they can defraud the public. There must be a rule that says they HAVE to print disclaimers but why allow them to side step the law by adding an unreadable message? I have a 61" TV and I can't read it so how could a 21" screen show it? PLEASE try to help us by doing what is right. Isn't it your purpose to protect the public? Don't allow these institutions to water down something that is right and just. Afterall, those that really want to hear from these advertisers would not have signed up for the list!!!

Thank you.
